PERSONAL STATEMENT

As a Computer Science and Engineering student, I am motivated to continually develop my skills and grow professionally. I have experience building interfaces and websites, using GitHub, solving problems, and collaborating on team projects. Beyond coursework, I have hands-on experience in embedded systems, having built and programmed an Arduino-based autonomous system from scratch, working through real hardware and software challenges to bring it to life. My research interests include machine learning algorithms, sentiment analysis, NLP, and real-world problem-solving, and I hope to conduct impactful research and leave a meaningful mark in the field.

EDUCATION

American International University-Bangladesh (AIUB) Kuril, Dhaka

Bachelor of Science in Computer Science & Engineering (Ongoing) — 10th Semester

Cumulative GPA: 3.58 / 4.00

Hamidpur Al-Hera College

Hamidpur, Jashore

Higher Secondary Certificate (HSC) — Science | June 2019 – December 2021

Cumulative GPA: 4.98 / 5.00

Jashore Zilla School

Mujib Sarak, Jashore

Secondary School Certificate (SSC) — Science | 2011 – 2019

Cumulative GPA: 4.72 / 5.00

EXPERIENCE

Junior Software Engineer — SUVASTU PROPERTIES **3 Months (Ongoing, until December 2026)**

- Contributing to the development of a module within the company's ERP system, learning through hands-on work on a live, real-world codebase.
- Working alongside the engineering team to understand requirements, implement features, and resolve issues.
- Gaining practical experience with professional software development workflows, version control, and collaborative delivery.

Volunteer & Lead Photojournalist — IEEE AIUB Student Branch

Present

- Contributed as an active volunteer in organizing and coordinating IEEE AIUB Student Branch activities.
- Documented branch activities through professional photography and photojournalism.
- Collaborated with the communications and media team to produce high-quality visuals.
- Demonstrated strong teamwork, time management, and communication skills.

PROJECTS

- Virtual Portfolio 3.0** (borobhairion.github.io/Virtual-portfolio3.0/works.html) — Developed a responsive personal portfolio website showcasing projects, skills, and experience.
- Webtech Group 4** (github.com/BorobhaiRion/Webtech-Group-4) — Built an interactive university e-commerce website using PHP, SQL, JavaScript, HTML, and CSS, applying MVC architecture.
- Zengg Cafe** (zenggcfe.netlify.app) — Developed a cafe management system with automated pricing and menu management, customer feedback integration, and a custom React/Supabase dashboard.

SPECIALIZED

- Trained in applying machine learning concepts and workflows to practical, self-directed AI/ML projects.
- Proficient in C++ and JavaScript, with hands-on experience building interfaces and websites.
- Experienced with GitHub for version control and collaborative team projects.

SKILLS

- Machine Learning & AI:** model training fundamentals, sentiment analysis, NLP concepts, algorithm design
- Database Management Systems:** Oracle 10g, SQL, Supabase
- Web Development:** MVC (PHP projects)
- Object-Oriented Programming** in Java
- User Interface Design** in Java and C# (.NET)
- Understanding of basic electronics
- Comfortable in C++, Python
- Software development process and testing
- Photography
